#### Side Elevation

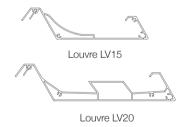

#### Louvre Stormguard Seal

Sealing solution stops water dripping over louvre gutter channel by providing a soft cushioning barrier between point of louvre junction.

Slightly opening of louvres creates natural air flow for application areas.

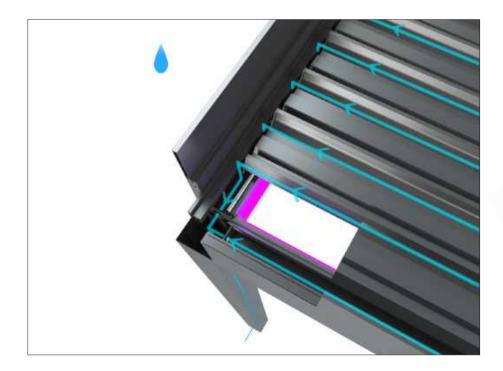

Protecting from sun exposure while ensuring air ventilation under the system .

Ensuring waterproof coverage when louvres are in fully closed position.

000

Each channel on louvres drain the water through four sided gutters connected with columns.

Functional seal entegrated on louvre channels provides maximum protection from water dripping.

## Closures

Sliding Glass System
The combination of the sliding glass system

The combination of the sliding glass system ensures efficaciously protection from wind and rain. The aluminium frames which cover each glass panel provide maximum safety standards and practicality with elegance details.

rev. 4-11/2018 Page 13

Zip System

The minimalist, slimlane, contemporary design of the zip system provides comfortable shade and protects aganist the UV rays. The system includes motorised painted aluminium structure, entirely powder-coated with stainless steel bolts and screws.

Sapphire Glass System
Sapphire can be adapted and offers a maximum clear span that provides unobstructed view & minimalistic style with no vertical frames. The system is operated by just the touch of button.
